EXPERIENCE

Machine Learning Engineer

Nov 2025 – Present

Korn Ferry (ResearchFox) (Remote)

- Building Job Classifier Agent Workflow with inbuilt **ML models** + **GenAI Response** + **Chat Interface**, particularly for talent acquisition teams.
- Built Machine Learning models to **Predict Salary Estimates** based on historic data with very sparse data points, adding a key component in Talent Suite Product.
- Worked on Tableau **MCP** and TabPy Server with integrated **LangGraph** flows and OpenAI SKILLS to enhance Dashboards in Tableau by adding complex analysis at a glance and mapping systems for **production**.
- Architected scalable MLOps pipelines using **FastAPI**, **Docker**, **Kubernetes**, and **GitHub Actions**, ensuring robust AI Observability via **Datadog** and **Arize AX**.
- Working on POCs as well as some production products with **170M+** user profiles.

Machine Learning Engineer

Nov 2024 – Nov 2025

ACE Software Solutions (India) Pvt Ltd (Remote)

- Developed production-grade agentic workflows using **CrewAI**, **LangChain**, **LangGraph** and **n8n**. Worked with **Amazon Bedrock**, **Huggingface**, **OpenAI** and **Ollama**.
- Designed and developed **MCP Servers** to handle complex queries in banking and compliance.
- Built and deployed scalable pipelines using **Flask** / **FastAPI** + **Docker** for every project.
- Worked as a single contributor as well as leading a team of two.

Data Scientist

Aug 2023 – Nov 2024

Kratin LLC (Remote)

- Implemented **Speech-to-Text** with intent mapping (**RASA**) using **Azure Speech AI** and fine-tuned **Azure OpenAI** models, enhancing voice command accuracy.
- Leveraged **LLMs (GPT, Llama2)** to automate tasks and develop **RAG** and **NER** applications, reducing process time by **40%** and improving chatbot interaction quality.
- Created a time-series ML model to predict patient health progression, enabling early lymphedema diagnosis for 20,890+ patients using **SOTA prediction techniques**.

Junior Data Scientist

Jan 2023 – Jul 2023

Kratin LLC

- Constructed and managed **graph databases (Neo4j)** to uncover and analyze complex data relationships, improving data insight retrieval speed.
- Designed a scheduler algorithm for workforce time optimization, enhancing operational efficiency at scale.

EDUCATION

Shri Guru Gobind Singhji Institute of Engineering and Technology

2019 – 2023

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.3

Sant Tukaram National Model School

2017 – 2019

CBSE Board

84.6%

KEY PROJECTS

Voice Agent Pipeline | *Python, LiveKit, Deepgram, OpenAI, Huggingface* | [GitHub](#)

- Architected a customizable voice agent pipeline integrating **Deepgram (STT)**, **OpenAI (LLM)**, and **Cartesia (TTS)**; incorporated open-source models for EOU detection and VAD.
- Enabled full preprocessing/postprocessing customization and demonstrated multiple POC tasks for real-time voice interaction systems.

Stitchit (iOS App) | *Python, Flask, Swift, AWS, Neo4j, Docker* | [Testflight](#)

- Developed a full-stack iOS app to prevent content theft using **computer vision (PANNs, Swin Transformer)** to calculate video similarity across the platform.

- Implemented user-specific AI bubbles via a **graph database (Neo4j)** for enhanced personalization and content recommendation.

Gen AI Dashboard | *Python, Flask, OpenAI, RASA, NER, SQL*

- Engineered a chatbot that translates user queries into optimized SQL, auto-selects best-fit visualizations, and masks **PHI/PII** using a Huggingface **NER model**.

RAG Chatbot | *Python, Flask, Azure OpenAI, RASA, CosmosDB*

- Built a high-accuracy RAG chatbot with intent mapping (**RASA**), caching, and vector search to answer clinician questions based on a specialized knowledge base.

OTHER PROJECTS

Clinician Note Analyzer – Patient personalizer AI using NER and GraphRAG for summarization and preference grouping.

SmartTextArea – AI-enhanced text component with mic, summarizer, and live dictation using Azure AI services.

Workforce Optimization – Constraint programming algorithm for optimal workforce scheduling.

Patient Health Progression (LSTM) – LSTM model to predict LDex trigger points in hospice patients with lymphedema.

SKILLS

Programming: Python, SQL, NoSQL, Cypher, JavaScript, Java, C, C++, HTML/CSS

ML/AI: LLMs (OpenAI, Llama2), RAG, NER, Langchain, CrewAI, Langgraph, PyTorch, TensorFlow, scikit-learn, Pandas, spaCy, RASA, Huggingface

Cloud & Tools: AWS (Bedrock, AgentCore, ECR, CloudWatch), Azure (AI Services, Data Factory), Docker, Git, GCP, Neo4j, Weights & Biases, Apache Spark, Kubernetes, Datadog, Arize AX

Frameworks: Flask, FastAPI, Streamlit, Angular, n8n, MCP, A2A

Soft: Project Management, Stakeholder Management, Project Scoping, Agile Methodology

CERTIFICATIONS

Machine Learning with Python <i>Jan 2026</i>	IBM
Introduction to Deep Learning & Neural Networks with Keras <i>Jan 2026</i>	IBM
Foundations of Project Management <i>Jan 2026</i>	Google
Deep Learning with Keras and Tensorflow <i>Jan 2026</i>	IBM
Project Initiation: Starting a Successful Project <i>Jan 2026</i>	Google
